Scholarship Policies – Action Item
President Fries informed the Board that despite an array of funding sources for academic scholarships, the need for financial aid exceeds available funding. Most of the scholarships are tied to tuition and other campus charges such that the cost of the scholarship increases every time tuition and fees are increased. Because tuition decisions are not made until the end of April, both the awarding and budgeting for the scholarships occurs late in the spring.

Most freshmen have been awarded a tuition scholarship for the fall semester but basically no money for the spring semester unless they qualify for the lottery scholarship and the majority of the students do not qualify. This means that students that chose Highlands received financial help for
the fall, but then they have to pick up the tuition in the spring, this is probably a retention problem. A solution to this problem is being proposed.

The following changes are being proposed:
- Decouple scholarship awards from tuition rates and establish flat dollar amounts that would be reviewed annually and are not automatically raised.
- Spread freshmen awards at least partially into the spring semester.
- Increase the requirement for scholarship students to 15 credits per semester as the lottery scholarship is doing.
- Renaming several of the current scholarships to put more emphasis on academic success or a particular goal of the scholarship.

A draft of the scholarship proposals was provided (Attachment W).

Regent Marchi moved to approve the Scholarship Policies subject to funding review. Regent Martinez seconded. Voting in favor of the motion were: Chairman Sanchez, Regent Marchi, and Regent Martinez. Motion passed unanimously.

President Fries reported on the following:
- **Administrative Searches/Appointments**
  Over 50 applicants were received for the Athletic Director position. Dr. Trujillo is chairing the search.

  On April 8th, three candidates for the Vice President for Advancement position will be on campus for interviews and interview forums. This is a critical position for the university to move forward academically and athletically.

- **Hydrazine Technology Recognition**
  The technology has been recommended for publication in the NASA ASA Tech Brief publication. The technology was nominated by the Johnson Space Center for the 2014 space technology hall of fame.

- **NMHU Research Day April 4th**. A number of students and faculty will be presenting papers on the research they have been doing. 1/3 of the research papers presented at the recent EPSCoR conference were from people at NMHU.

- **Commencement Speakers**: Dr. Sylvester Perez in Las Vegas and Ms. Monica Armenta in Rio Rancho

**Las Vegas Moving Forward**
The City has a $30 million project to rebuild the Bradner Dam. The will increase the storage capacity of water to more than a year’s worth of water. The project is critical to expanding housing developments, economic development, etc... As soon as Highlands is sure that dam project will take place, Highlands’ needs to move forward as an institution and investigate a public/private partnership to develop the golf course property.
An experienced/knowledgeable buyer is looking to buy the Castañeda and Plaza Hotels. Symbolically that will have a huge impact on the attitudes toward the future of Las Vegas.

Meetings with the West Las Vegas Schools leadership and the administrative team from HU have been productive. The group is working together to reduce the number of WLV students from having to take remedial courses when they enroll at Highlands.

Invitations to WLV and Mora Independent Schools seniors to have the graduates wear their regalia and sit in a designated seating area during the NMHU commencement ceremony. An invitation to Las Vegas City School will be extended in the near future. The high school graduates will be given a stole to wear that reads NMHU class of 2018.

- **Goals**
  He chose Highlands because of what he knew about Highlands. He wants everyone at the university to make Highlands their university of choice. He wants all to say they “choose NMHU”.

  He is instituting Purple Pride Day on Fridays; where everyone should represent Highlands proudly by wearing purple or attire with an NMHU logo as he will be.

This institution is important to the future of Las Vegas.

- **IPEDS and Peer Group**
  See attachment U.

- **Funding Formula**
  Higher education is now being funded based on outcomes. It no longer matters how many students are enrolled on census day, it matters how many students are enrolled at the end of the semester; the number of total degrees or certificates awarded; STEM and health degrees awarded (which includes social work); at risk degrees awarded; momentum points of 30 or 60 hours; and a modest amount of funding for research universities based on the number of research grants they are bringing in.

- **FY15 Budget Overview**
  - **Tuition, Fees, Room and Board Rates**
    Highlands has the absolute lowest in-state tuition and fees. Should Highlands offer the lowest when in our society quality is consistently equated with cost? There are benefits to being number one on the list (Attachment X) but there are also negatives. Discussions over the next few weeks will be held to determine where NMHU should be positioned on the tuition and fees listing.
  
  - **Operations and Travel Policies**
    HU received a $265,000 appropriation for athletics for athletic equipment and improvements.
$5 million was included in the general obligation bond package

$92,000 in Bond B library funding was also included for Highlands

- Programs
  Advanced Placement received additional funding

The nursing expansion program did not receive additional funding.

$100,000 appropriation for the oil and gas management program was vetoed

- Athletics
  Received an increase of recurring funding of $156,000

- Other
  Dr. Aguilar identified over 3,900 people on linkedin who recognized some relationship with Highlands in their profile.

The lottery scholarships will be funded for the spring semester.
